**North Twin Lake Property Owner or Occupant
Vilas County, WI**

Re: Proposed Aquatic Herbicide Application for Eurasian watermilfoil control North Twin Lake.

Dear North Twin Lake Property Owner or Occupant:

The North and South Twin Lakes Riparian Association (NSTLRA) with support from the Wisconsin Department of Natural Resources (WDNR), Onterra, LLC., and Clean Lakes, Inc. (CLI) proposes to assess and chemically treat approximately 25 acres on North Twin Lake to control the excessive growth of the exotic invasive aquatic plant, Eurasian watermilfoil (EWM). NSTLRA proposes to conduct an application of DMA 4 IVM (liquid 2, 4-D) and Aquathol K (liquid endothall) to be performed by CLI. We anticipate the treatment to occur sometime in spring, 2017 and will proceed only after the District obtains a permit for the treatment from the Wisconsin Department of Natural Resources.

Notification of the exact dates of treatment and water use restrictions associated with the use of DMA 4 IVM and Aquathol K will be provided by the posting of shoreline in and adjacent to treatment areas, and public access points.

The water use restrictions associated with use of the above pesticide are noted below:

21 Day Irrigation Restriction

For additional information on the proposed treatment including a completed copy of the permit application, DNR Chemical Fact Sheets on 2,4-D and endothall as well as proposed treatment map please visit : **www.nstrla.com** or contact below;

For questions about the treatment, please contact:

Jay Wittman, NSTLRA Board of Directors: **jjwittman@charter.net** or 715-574-9531
