

PUBLIC NOTICE

The North and South Twin Lakes Riparian Association (NSTLRA) proposes to chemically treat approximately 25 acres of North Twin Lake to control excessive growth of exotic invasive aquatic plants.

Clean Lakes, Inc. will conduct an application of the aquatic herbicides Aquathol K (endothall) and DMA 4 IVM (liquid 2, 4-D) to infestations. It is anticipated that the treatment will occur in spring 2017 and will proceed only after the NSTLRA obtains a permit for the treatment from the Wisconsin Department of Natural Resources.

The water use restrictions for endothall and 2, 4-D are as follows:

There are no swimming or fishing restrictions. Do not use water from treated areas for irrigation purposes for 21 days after treatment, or until an approved assay indicates the 2,4-D concentration is 100ppb (0.1ppm) or less.

The NSTLRA will hold a public informational meeting on the proposed treatments if five or more individuals, organizations, special units of government, or local units of government request one in writing. The person or entity requesting the meeting shall state a specific agenda of topics including problems and alternatives to be discussed. The request for a public informational meeting must be sent in writing to NSTLRA, P.O. Box 163, Phelps, WI 54554 and to Wisconsin Department of Natural Resources, 107 Sutliff Avenue, Rhinelander, WI 54501 within 5 days after the public notice is published.
